out of 5981 votes

Click on the green **Download Now** button. All other hyperlinks on these pages have nothing to do with the software package you want.

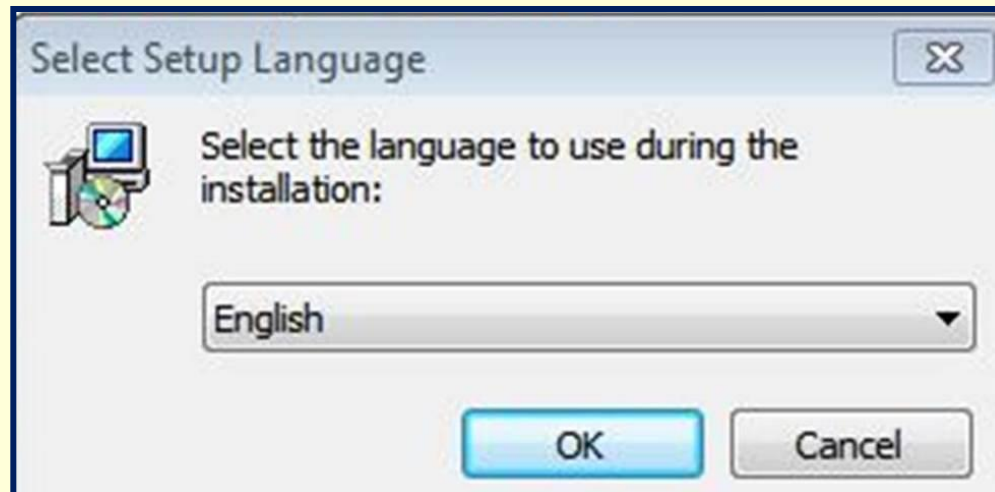

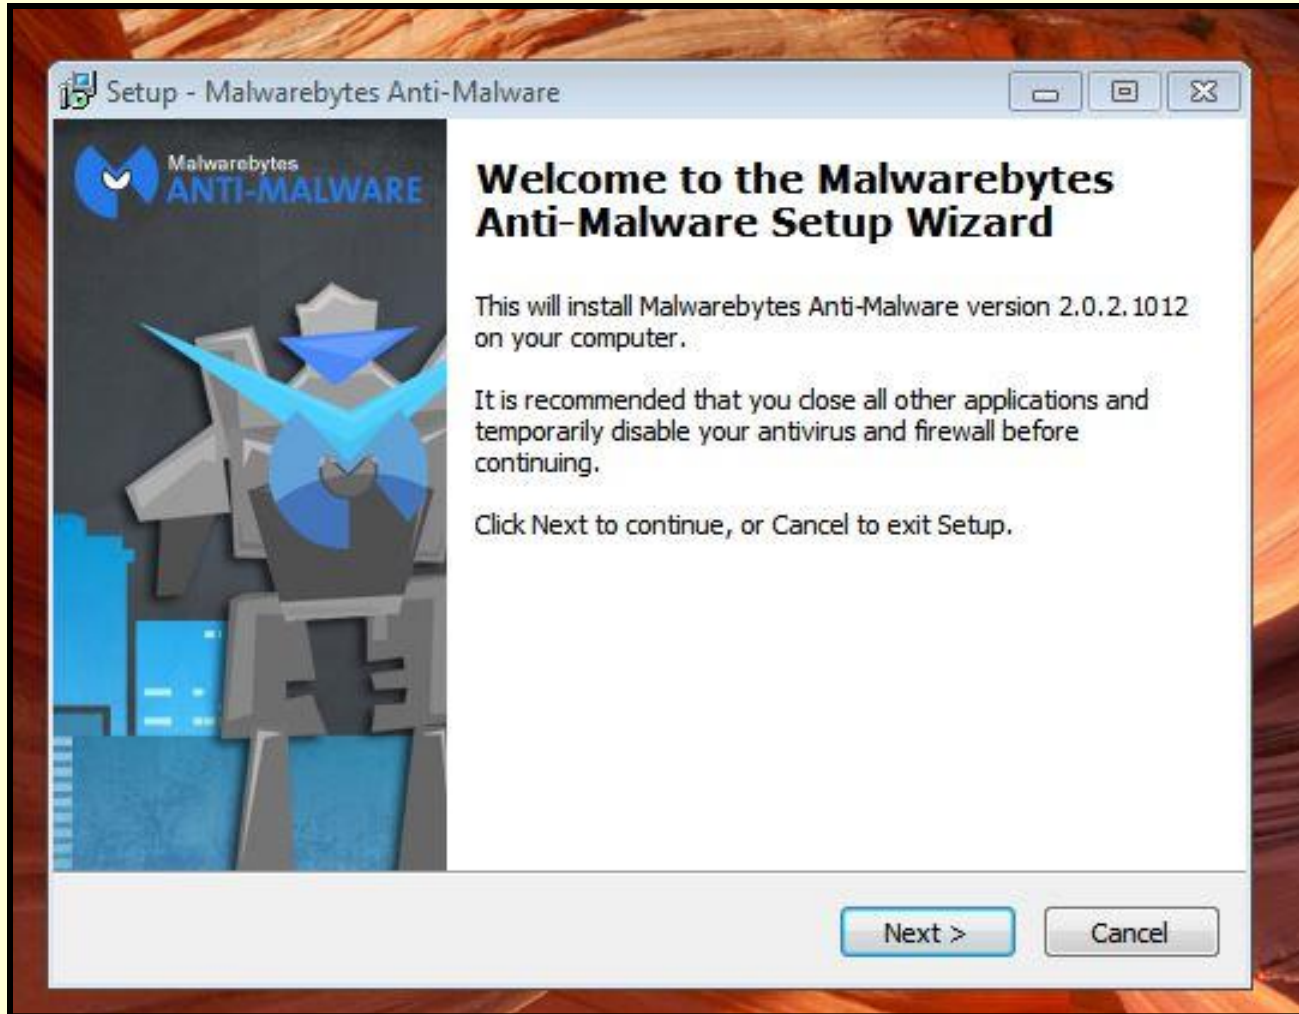

Click the **Save File** button to download the installation program to wherever all downloads are stored. Click on the mbam-setup file to begin the installation

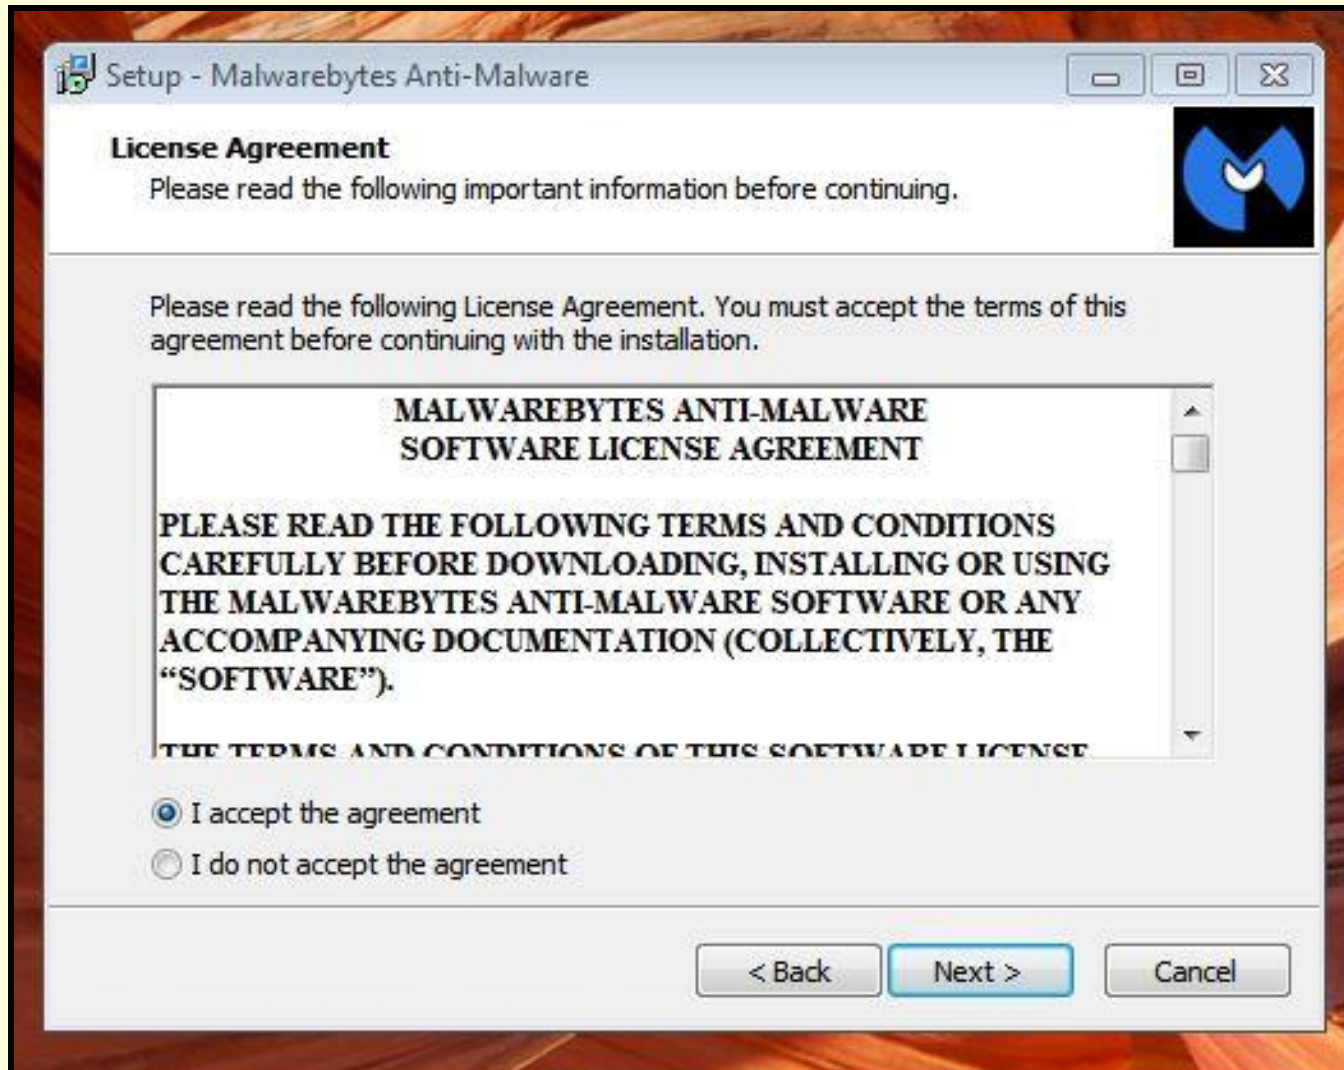

Click on the **Run** button if prompted.
Then **OK** when asked about Language

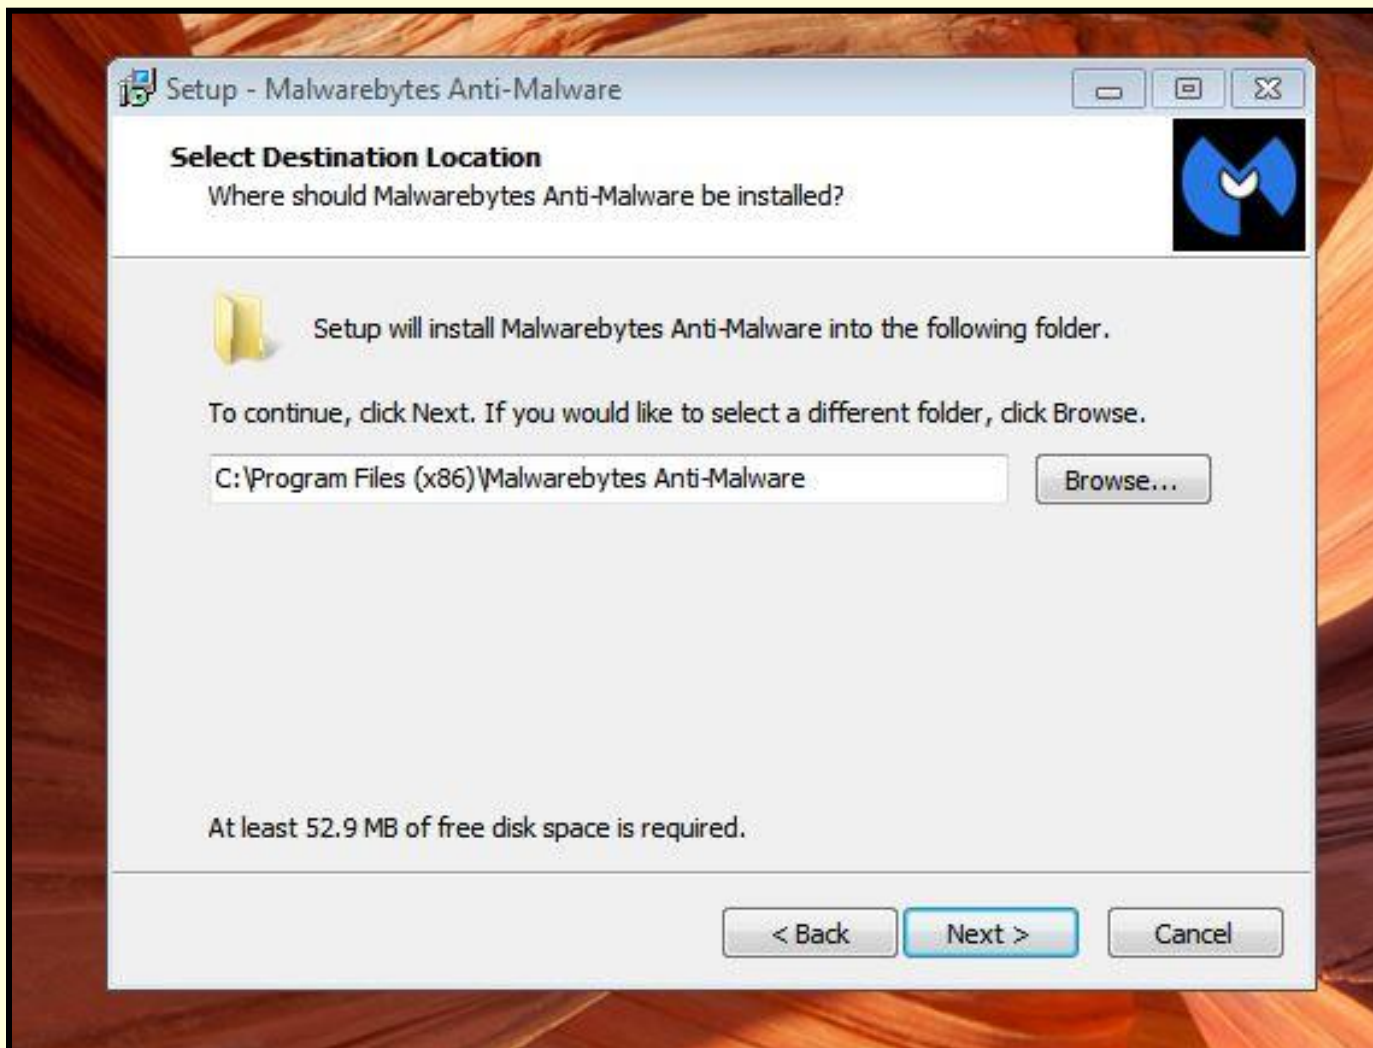

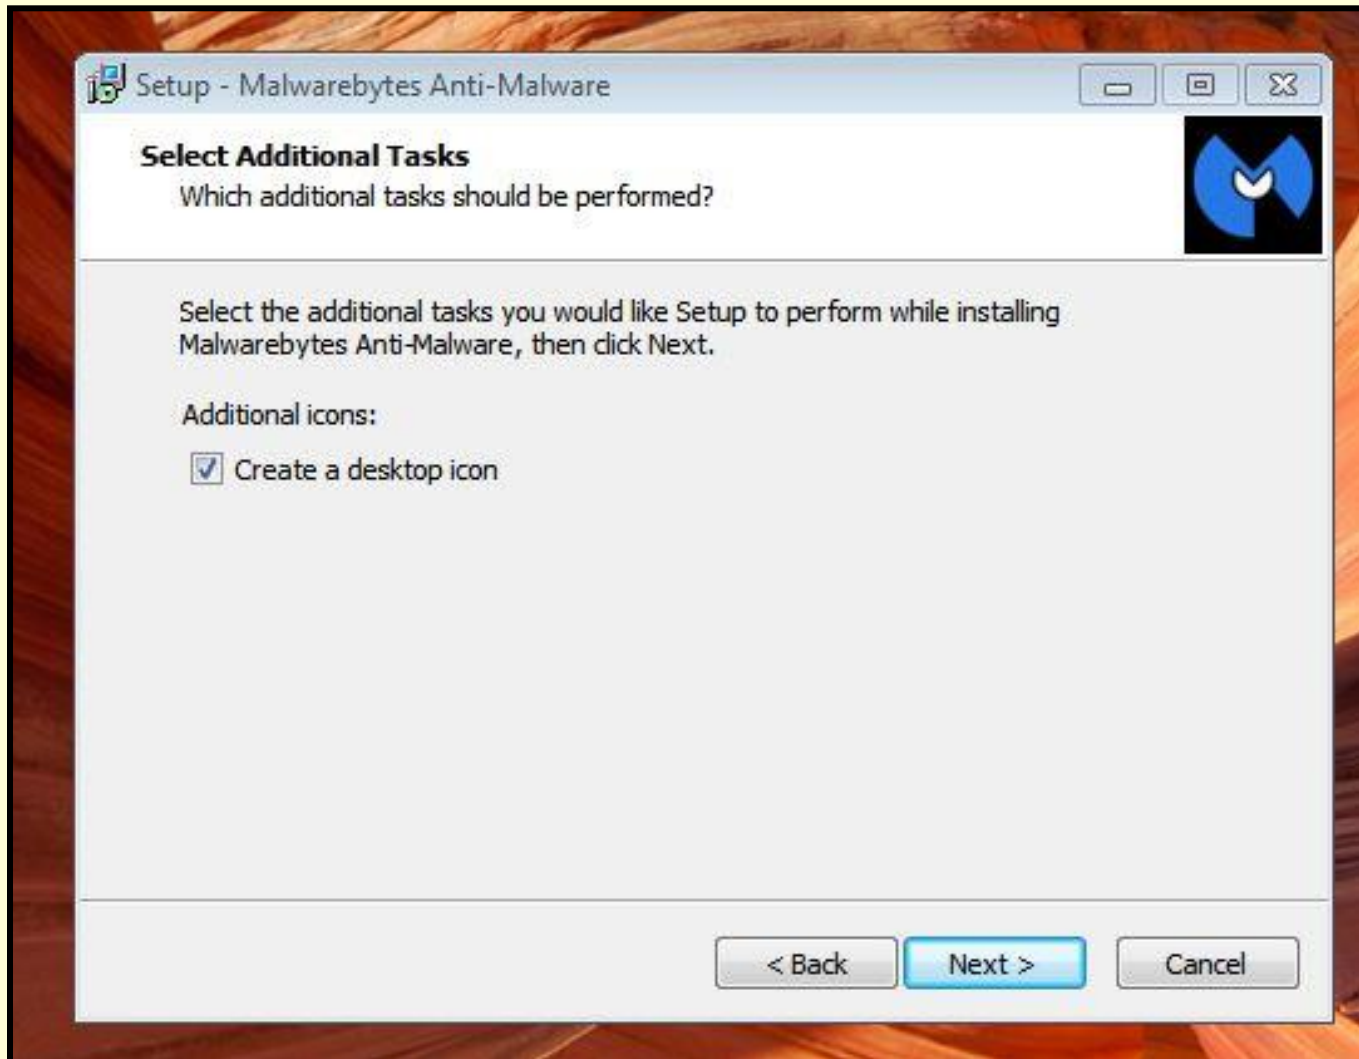

Click on Next to begin installation

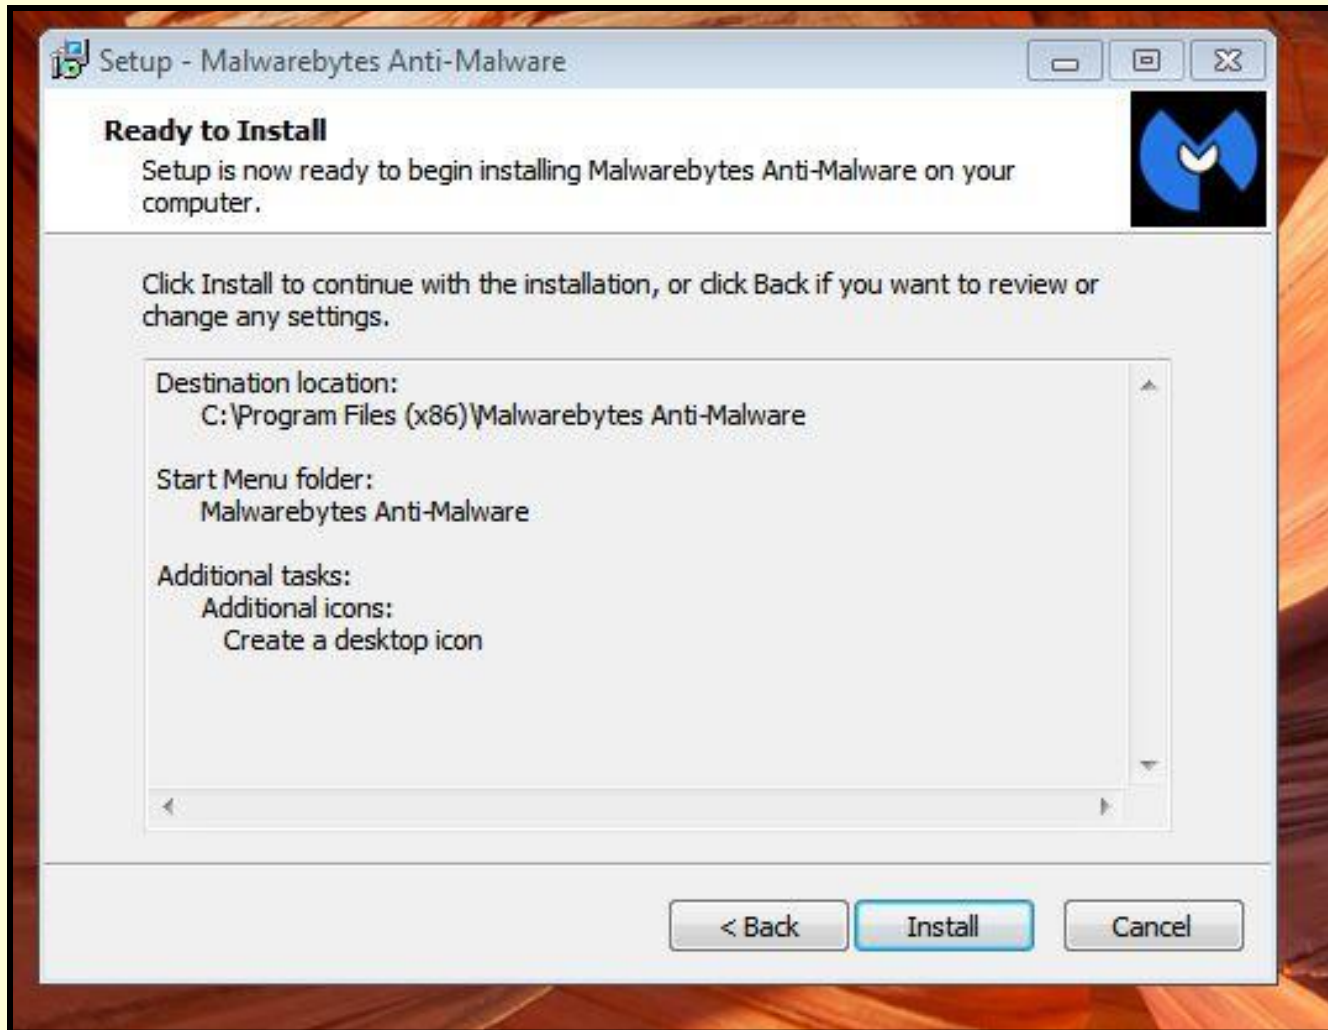

Accept the free licensing agreement and click **Next**

Allow Malwarebytes to install in the default folder.
Just click **Next**

Leave the box checked and click **Next**

Click **Install** so the program can continue

Special note - Uncheck 1st box for free trial of Premium version.
Then click on **Finish**

Malwarebytes Anti-Malware (Free)

License:

✘ Malwarebytes Anti-Malware (Free)

[Buy Premium »](#)

Database Version:

✓ v2014.07.13.07

[Update Now »](#)

Scan Progress:

✓ Not Running

Real-Time Protection:

✘ Available with Malwarebytes Anti-Malware Premium

[Start Free Trial »](#)

When installation is complete, you will see this screen.

Because this is a free version, the first and fourth item do not matter.

Only the **Database & Scan** items need your attention to update.

The screenshot displays the Malwarebytes Anti-Malware interface. At the top, it shows the product name 'Malwarebytes Anti-Malware (Free)' with a red 'x' icon and a 'Buy Premium >' link. Below this, the version 'v2014.07.13.07' is shown with a green checkmark and an 'Update Now >' link. The status is 'Not Running' with a green checkmark. A red 'x' icon indicates that certain features are 'Available with Malwarebytes Anti-Malware Premium' and a 'Start Free Trial >' link is provided. At the bottom, there is a large green 'Scan Now >' button. To the left of the button, there is a section with a blue background containing text about backup services. Below the 'Scan Now' button, it shows 'Last Scan: Threat 6 days ago | Scheduler | Need Help?'.

✘ Malwarebytes Anti-Malware (Free)	Buy Premium >
✔ v2014.07.13.07	Update Now >
✔ Not Running	
✘ Available with Malwarebytes Anti-Malware Premium	Start Free Trial >

[Scan Now >](#)

Last Scan: Threat 6 days ago | [Scheduler](#) | [Need Help?](#)

Click **update now** to ensure the database is at the latest version

Then click **Scan Now** so it scans your entire computer for malware, spams, and viruses.

The screenshot displays a security scanner interface with two main columns. The left column lists the status of various scan components, each preceded by a green checkmark icon. The right column provides real-time scan statistics, including a progress bar, the number of objects scanned and detected, the time elapsed, and the current file being scanned.

Component	Status
Pre-scan Operations	Done
Memory Objects	Done
Startup Objects	Done
Registry Objects	Done
Filesystem Objects	Working
Heuristic Analysis	Pending

Scanner Progress	<div style="width: 75%;"></div>
Objects Scanned	33005
Detected Objects	0
Time Elapsed	00:10:03
Currently Scanning	C:\WINDOWS\SYSTEM32\vdsvd.dll

The entire scan takes awhile based on the size of your hard drive and contents. While the scan is in progress, you can continue to use the computer for other things but expect that it may run a bit slower until the scan is completed

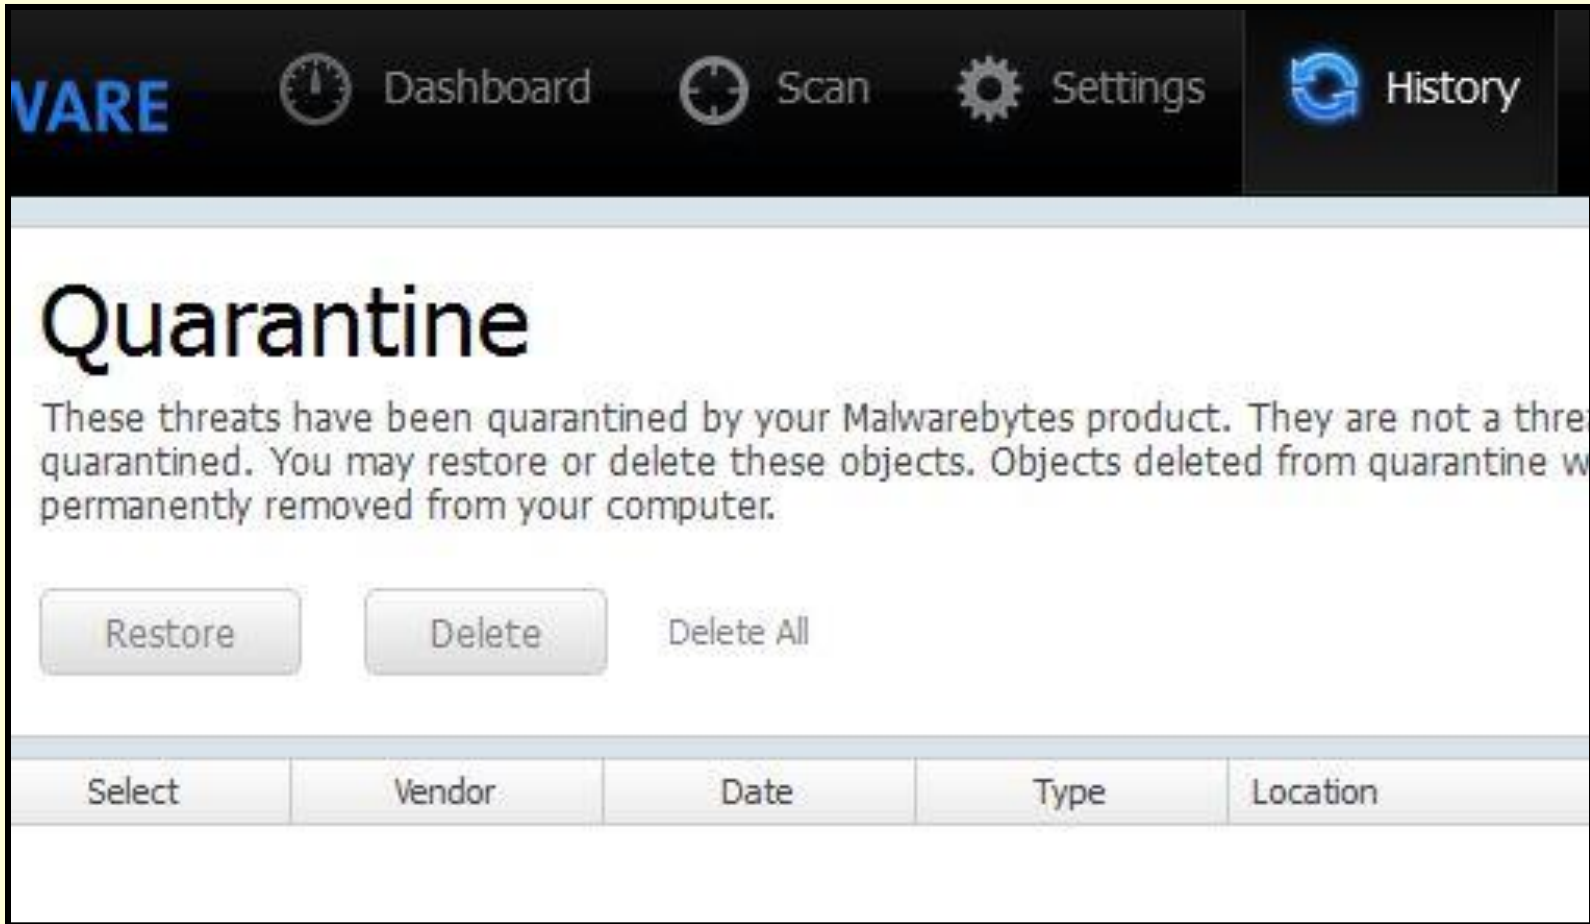

Malwarebytes Anti-Malware has finished scanning your computer!

Scan completed successfully! No malicious items were detected!

Scan Type:	Threat Scan
Time Started:	Mon Jul 14 06:35:24 2014
Time Elapsed:	00:29:53
Objects Scanned:	264134
Objects Infected:	0

Once the Scan is completed, you will see this screen. Look at the last line to see if it found any “objects infected”.

To see how many malwares, spams, and viruses were removed, click on the History tab on the top. Any listed, should be removed. Click **Delete all**.

In all the years of use, Malwarebytes has always made the right decision.

Then you can click on the upper right **X** to close the program.
